Top Skills

Software Design
Mobile Application Development
Continuous Integration and Continuous Delivery (CI/CD)

Kirill Lebedev

Senior React Native Developer
Almaty, Kazakhstan

Summary

React Native developer with >5 years of experience creating and maintaining mobile apps for iOS and Android. Recognized for strong problem-solving skills and an ability to quickly learn new technologies.

Passionate about clean, strongly typed code. Proven ability to cut corners to provide features in time while maintaining high code quality. My strength is finding an approach to get along with team members and clients. Being attentive, supportive and polite doing code-review. Not afraid of complicated tasks and legacy code

During my work I used to:

- Create, deliver and maintain different applications, such as Point of Sales, Online shopping, Internal Business Applications, News apps, Chats, Templates and more
- Design application architecture according to Feature-Sliced Design methodology using react-navigation, axios, socket.io, Redux, RTK and RTK-query/React Query
- Build a high variety of features such as internationalization, push notifications, navigation, deeplinks, camera, work with files etc.
- Collaborate with system analysts and designers on feature implementation and UI/UX design decisions to create mockups as needed
- Implement unit and snapshot tests with coverage 90+ using Jest and react-native-testing-library
- Implement e2e tests using Detox
- Refactor and restructure legacy code
- Create simple native modules for iOS and Android
- Support my team with cross-project code review, mentoring, weekly meetings to discuss difficult cases and new ideas
- Prepare and conduct technical interviews for employees assessment
- Weed out resumes and interview applicants

- Find ways to speed up the development process. For example I created customizable cross-project ui-kit library to stop repeating ourselves (https://github.com/lad-tech/mobydick)

Skills: TypeScript, JavaScript, React Native, Redux, RTK, Jest, Detox, React Navigation, Axios, Socket.io, Git, Firebase, React Query, Graph Query
English level - B2 - Upper-intermediate

Favorite projects:

Experience

Individual Entrepreneur Lebedev
Consulting Software Engineer
October 2025 - Present (1 year 2 months)
Almaty, Almaty, Kazakhstan

Technologies:

Languages: JS/TS, Kotlin, Swift
Frameworks: React Native/Expo
Libraries: Jest, Maestro, date-fns, i18n, Firebase, React Navigation, React Hook Form, zod, expo-router
State management: zustand, RTK Query
Animation tools: Reanimated, React Native Skia
Architecture: Feature-Sliced Design
Other: Sentry/Sonar, npm/Yarn/bun, REST API/GraphQL, CI/CD

Projects:

1. Call center app Oct 2025 – Dec 2025

- Rewrite old app RN 69 to newest expo sdk
- setup CI/CD

2. Local messager app Jan 2026 – Aug 2026

- CI/CD with Fastlane and GitHub Actions: version bump, tagging, iOS/Android builds and releases.
- Soft and hard app updates; SMS-abuse protection with reCAPTCHA Enterprise; stabilised the auth flow.
- Chat list scroll optimisation with FlashList; offline storage with SQLite and MMKV.
- Push notifications, Crashlytics, Remote Config, Sentry; media sharing, files and camera roll.
- Reusable skeleton animations; maintaining the codebase.

3. Dating app Aug 2026 – Oct 2026

- Rewrote a no-code website into one Expo codebase that ships the iOS app, the Android app and the website.
- Server-rendered web with API routes on EAS Hosting.
- Stripe checkout on web and native, including Apple Pay and Google Pay; onboarding quiz funnels; GA4 analytics.

IT-company LAD
Senior Mobile Developer
April 2021 - October 2025 (4 years 7 months)
Nizhniy Novgorod, Russia

Technologies:

Languages: JS/TS, Kotlin, Swift
Frameworks: React Native/Expo
Libraries: Jest, Maestro, Day.js, i18n, Firebase, Axios, Socket.IO, React Navigation, React Hook Form, Apollo GraphQL
State management: Redux Toolkit, RTK Query
Animation tools: Reanimated, React Native Skia
Architecture: Feature-Sliced Design
Other: Sentry/Sonar, npm/Yarn/bun, REST API/GraphQL, CI/CD

Projects:

1. Infrastructure: 04.2021 - 10.2025
- Configuring CI/CD
- Configuring pre-commit hooks
- Unification of configurations (eslint/semantic/prettier)
- Configuring the registry (gitlab and npm)

- Converting libraries to open-source

2. Application for storing discount cards: 04.2021 - 02.2022
- Optimization of application launch speed
- After Bitrise stopped working in Russia, I wrote my own project builder, which is now used in all projects

3. Online store of clothes and shoes: 02.2022 - 10.2023
- Updating a large project from React Native versions 0.60.6->0.65.1->0.72.7
- Moving to typescript
- Optimization of the cash register and issuing orders
- Integration with Shares, with Atol, bluetooth scanners

4. Mobile component libraries: 01.2022 - present
- creation/support of a design system library, together with designers
- creation/support of a library for drawing complex animated graphs
- creation/support of a library for working with the keyboard

5. Mobile application for HR: 10.2023 - 04.2024
- Unification of refresh/access tokens for all projects
- Sections profile, company hierarchy, news, obtaining certificates and payrolls
- Integration with 1C
- Chats with consultants
- Creation of a flexible role model

6. Fitness app: 10.2023 - 04.2024
- Sections profile, training, health, nutrition, online store, video calls, consultations
- Integrations with IoT (google health/apple health)
- Animated charts/progressbars

7. Development of templates for quick start of projects: 04.2024 - present
- Thanks to the template, we were able to make an application in 1 month for the customer

Studio TG
Software Engineer
October 2020 - April 2021 (7 months)
Nizhniy Novgorod, Russia

- Project support, adding new features, fixing bugs

Achievements:

- Moving to typescript
- Implementing testing
- Configuring pre-commit hooks
- Unifying configurations (eslint/prettier)

ООО Микролайн

Software Engineer

September 2019 - October 2020 (1 year 2 months)

Nizhniy Novgorod, Russia

Achievements wrote: applications for ios and android to communicate with the alarm via Bluetooth low energy,

Responsibilities: acceptance into working condition and adding new features for the site - https://zont-online.ru/demo

---

Education

Nizhny Novgorod State University of Architecture and Civil Engineering (NNGASU)

Bachelor's degree, Civil Engineering · (September 2015 - July 2019)
